

Keep each other safe from Covid-19 risk.

The following is a list of basic mandatory rules to be followed at all times on site, so we can all do our bit:

STAY APART

Keep 2 metres apart as much as possible

FACE COVERINGS

Face coverings must be worn if within 2 metres of another person on site (*this applies inside buildings and externally*)

WASH HANDS

Wash your hands on arrival to site and before leaving. When on site wash your hands frequently, and use hand sanitiser stations on site

SMALL TEAMS

Where possible stay in small teams and do not mix people between crews

EQUIPMENT

Try not to share tools, equipment and machinery. If you do have to, sanitise these between users

VEHICLES

Avoid sharing vehicles where possible. Where vehicles are shared, share with the same people to create a bubble (*maximum of six persons*) and face coverings to be worn.

LUNCH BREAKS

Lunch breaks should be taken in vehicles to avoid mixing and close contact. Mess rooms only to be used where 2 metre distancing is possible and there is good ventilation in place

SELF ISOLATE

Only come to work if you and your family are well. If you or a family member are displaying Covid symptoms, do not come to work and follow current government guidelines for self isolation.
